

Understanding the Digital World

Video Distribution & Consumer Electronics

State of Video Delivery Platforms

Markets at December 2013 & Forecasts to 2018

M14215SR2 – July 2014

- ● ● This document is a part of our "Video Delivery & Consumer Electronics" category which includes in 2014:
 - two datasets in Excel
 - two state-of-the-art reports in PowerPoint
 - three market reports in Word, each with its synopsis in PowerPoint
 - Privileged access to our lead Media analysts

Author: Jacques BAJON, Head of "Video Distribution" Practice

Jacques joined IDATE in November 2000, working as a Director of Studies. His assignments primarily involve strategic and sector-specific examination of the television/video and its distribution modes, from broadcast to telecoms/IP. He more specifically addresses digital delivery ecosystems and linked services. Jacques's previous experience includes freelance analyst for the Eurostaf / Les Echos group, carrying out market research and analysis of media and telecommunications industry companies, in addition to gaining experience in market analysis working for Ericsson. Jacques holds a post-graduate research degree (DEA) in International Economics (Université Paris X Nanterre) , a Master in Strategic Management of Innovation (Toulouse Graduate School of Management), and followed a training session in Investments in Telecom Networks from Télécom ParisTech..

About IDATE and DigiWorld Institute

Founded in 1977, IDATE has gained a reputation as a leader in tracking telecom, Internet and media markets, thanks to the skills of its teams of specialized analysts. Now, with the support of more than 40 member companies – which include many of the digital economy's most influential players – the newly rebranded DigiWorld Institute has entered into a new stage of its development, structured around three main areas of activity:

- IDATE Research, an offer of market intelligence publications
- IDATE Consulting, time-tested analysis
- DigiWorld Institute, a think tank on the digital economy

State of video delivery platforms

Contents

1. Video usage as part of ATAWADAC trends _____ 5

1.1. Broadcast (linear) TV remains dominant, but faces considerable challenges	6
1.2. This trend is taking concrete shape in TV revenues	7
1.3. Time-shifted TV viewing is increasing	8
1.4. Growing consumption of live and long-form streaming video ...	9
1.5. ... on all devices	10

2. Major changes ahead in the landscape of TV access_11

2.1. Europe: a maturing TV access market	12
2.2. North America: is cord cutting the major future trend ?	13
2.3. Asia-Pacific: the level of success in cable digitisation will define tomorrow's TV access framework	14
2.4. Latin America: DTH is the driving force for digital TV	15
2.5. Middle East Africa: the expected DTT rollout to help on digital transition	16
2.6. Is terrestrial TV still in the game?	17
2.7. Are satellite operators a move towards free TV ?	18
2.8. Cable has quad play as a target	19
2.9. Is fibre expansion the solution for telcos ?	20
2.10. LTE video: a new upcoming alternative	21

3. New challenges for video distributors to tackle _____ 22

3.1. The video subscriber base is at stake for MVPDs...	23
3.2. ... while the Internet access business grows	24
3.3. Very fast growth in Internet video traffic	25
3.4. LTE is accelerating further the fast growth trend of mobile data	26

3.5. In summary, new consumption modes mean new services. TV providers have to adapt. _____ 27

3.6. Ultra HD has already started, on the Internet. The mass market will take time. _____ 28

4. New distribution solutions are developing _____ 29

4.1. New technologies to accelerate connected TV / multiscreen deployment	30
4.2. CDN pure players diversify	31
4.3. Telco CDNs depend on partnerships	32
4.4. Is cloud TV the next frontier?	33
4.5. Broadcast-broadband TV to enhance linear TV	34
4.6. Mobile hybrid video ?	35
4.7. Towards an all-IP video distribution world?	36

5. User interface and devices _____ 38

5.1. Strong market power of new entrants	39
5.2. Internet Giants to control the User Interface?	40
5.3. A shift from operator to consumer hardware... leveraging cloud solutions	41

State of video delivery platforms

Tables & Figures

1. Video usage as part of ATAWADAC trends 5

• Average daily TV viewing in USA, UK, France and world	6
• Segmentation of average daily hours of TV viewing, UK	6
• Revenues of world television market	7
• Comparison of linear TV and on-demand video YoY revenues' growth, Europe 2011-'14	7
• Comparison of linear TV and on-demand video YoY revenues' growth, USA 2011-'14	7
• Average time spent per day, USA	8
• Evolution of non-linear/time-shifted TV consumption in USA, France and UK	8
• European Live vs. on demand	9
• European Time Watched by video length and country	9
• Time Watched by Video Length and Device, Q2 2013	10
• Long-Form Video Viewing By Device, Q2 2013	10
• Live, VoD Time Per Play, Q2 2013	10
• BBC iPlayer performance review, March 2014	10

2. Major changes ahead in the landscape of TV access 11

• Breakdown of TV access modes, in Europe	12
• Breakdown of TV access modes, in North America	13
• Breakdown of TV access modes, in Asia Pacific	14
• Breakdown of TV access modes, in Latin America	15
• Breakdown of TV access modes, in Middle East Africa	16
• Terrestrial distribution in households for TV delivery	17
• Fransat & HD+ Hybrid TV access platforms	18
• The acquisition of Time Warner Cable by Comcast	19
• Illustration Foxtel Play – Netflix-Virgin Media	19
• Breakdown of FTTH/B subscribers by zone	20
• Breakdown of FTTH/B subscribers by area	21
• Reliance Jio 4 th Generation LTE network with Android-run set-top box (STB)	21

3. New challenges for video distributors to tackle 22

• Quarterly evolution in video subscribers of the two biggest cable providers versus the two biggest IPTV providers, Q1 2010-'14	23
• Quarterly evolution in video subscribers in Europe, by operator, Q1 2010-'14	23
• Quarterly evolution in video subscribers in USA, by operator, Q1 2010-'14	23

• Changes in Comcast's video and Internet sales by quarter, Q1 2011-'14	24
• Quarterly evolution in Internet subs. in USA by operator, Q1 2010-'14	24
• Quarterly evolution in Internet subs. in Europe by operator, Q1 2010-'14	24
• Global fixed Internet consumer traffic	25
• A breakthrough, Aereo (live OTT+nPVR) shutting down	25
• Global mobile consumer traffic	26
• LTE boosts mobile data consumption	26
• New viewing habits, new features	27
• Share of pay-TV customers using TV Everywhere (USA)	27
• UHD TV also provides an immersive user experience	28
• 4K display technology provides consumers with richer mobile experiences	28

4. New distribution solutions are developing 29

• H.265 framework	30
• Synthesis of ABR-streaming technologies	30
• Akamai business solution revenues per segment	31
• Two types of CDN revenue streams	31
• Main Telco CDN deployments	32
• Cloud TV value proposition	33
• Examples of terrestrial and satellite TV broadcast broadband services	34
• Freesat / Freetime service line up	34
• Dynamic allocation of spectrum to unicast and broadcast	35
• Verizon INDYCAR 14 App	35
• ATSC 2.0 Protocol layer diagram- Fixed broadcasts	36
• DVB-GSE, complementing the MPEG-2 Transport Stream	36
• IP video on CMTS 3.0 solution	37
• Multicast ABR Video Transport System	37

5. User interface and devices 38

• Users and subscribers of selected platforms and YoY growth, Q1 2014	39
• Sky TV boxes	41
• TiVo Service, moving to the cloud	41
• Sony KD55X9005 4K 3D Smart TV characteristics	42
• Google Chromecast	42
• How streaming to the TV has evolved	42
