Wireless

# LTE-Advanced & 5G

Ultrafast mobile broadband on its way

M14306MR – May 2014

- This document is a part of our "Wireless" category which includes in 2014:
  - 1 dataset in Excel, updated twice yearly
  - 1 state-of-the-art report in PowerPoint, updated twice yearly
  - 4 market reports in Word, each with its synopsis in PowerPoint
  - Privileged access to our lead Wireless analysts

## Frédéric PUJOL, Director of the Wireless Business Unit

Frédéric Pujol joined IDATE in November 1992. As Director of the Wireless Business Unit, he is responsible for coordinating mobile industry forecasting and technical-economic analysis reports.

Previously, Frédéric acquired solid experience in mobile network architecture working for the France Telecom Group (Sofrecom, Telesystems).

He holds a post-graduate degree in engineering from ISEN (Institut Supérieur d'Electronique du Nord, Lille, 1986), where he majored in Telecommunications, and from CITCOM (Centre d'Ingénierie des Technologies de la Communication, Paris, 1987), where he majored in Network Architecture.

## Contributor

**Basile CARLE**, Senior consultant

## About IDATE and DigiWorld Institute

Founded in 1977, IDATE has gained a reputation as a leader in tracking telecom, Internet and media markets, thanks to the skills of its teams of specialized analysts. Now, with the support of more than 40 member companies – which include many of the digital economy's most influential players – the newly rebranded DigiWorld Institute has entered into a new stage of its development, structured around three main areas of activity:

- **IDATE Research**, an offer of market intelligence publications
- **IDATE Consulting**, time-tested analysis
- **DigiWorld Institute**, a think tank on the digital economy.

# Contents

<b>1. Executive Summary .....</b>	<b>8</b>
1.1. South Korea leading LTE-Advanced deployments .....	10
1.2. LTE-Advanced innovations - LTE-Advanced is ways richer than just carrier aggregation .....	10
1.3. Latest vendor developments .....	11
1.4. LTE-Advanced market taking off in 2014 .....	12
1.5. Future trends: '5G' already on the radar screen.....	13
<b>2. Methodology &amp; definitions .....</b>	<b>14</b>
2.1. General methodology of IDATE's reports .....	14
2.2. Market assessment and forecasts .....	15
2.3. Definitions.....	15
<b>3. LTE-Advanced front runners - South Korea leading LTE-Advanced deployments ..</b>	<b>16</b>
3.1. Asia-Pacific .....	17
3.1.1. South Korea .....	17
3.1.2. Japan .....	20
3.1.3. China.....	21
3.1.4. New Zealand .....	21
3.1.5. Australia .....	21
3.2. USA.....	22
3.2.1. AT&T Mobility: large small-cell deployment.....	22
3.2.2. Verizon Wireless .....	23
3.2.3. Sprint Nextel: partnering with Clearwire .....	23
3.2.4. Dish Network.....	24
3.3. Africa .....	24
3.3.1. South Africa.....	24
3.4. Middle East .....	24
3.5. Europe.....	25
3.5.1. Austria .....	25
3.5.2. Finland .....	25
3.5.3. France .....	25
3.5.4. Russia .....	26
3.5.5. United Kingdom.....	26
3.6. Frequency bands used for carrier aggregation .....	26
<b>4. LTE-Advanced innovations - LTE-Advanced has more to offer than just carrier aggregation.....</b>	<b>28</b>
4.1. Why is LTE-Advanced important today? .....	28
4.2. 3GPP developments - LTE-Advanced delivers more than carrier aggregation .....	29
4.2.1. Release 10 & 11 .....	30
4.2.2. Release 12 .....	32
4.2.3. Beyond Release 12).....	34

<b>4.3. LTE-Advanced challenges and benefits for mobile operators</b> .....	<b>36</b>
4.3.1. Carrier aggregation .....	36
4.3.2. HetNets .....	39
4.3.3. Interference management - eICIC .....	40
4.3.4. CoMP .....	40
4.3.5. MIMO improvements: Higher-order MIMO (HOM).....	41
4.3.6. Relay function.....	42
4.3.7. Device-to-device.....	43
4.3.8. PPDR functions.....	44
<b>5. LTE-Advanced - Latest vendor developments</b> .....	<b>46</b>
<b>5.1. Network infrastructure</b> .....	<b>46</b>
5.1.1. Huawei .....	46
5.1.2. ZTE .....	47
5.1.3. Ericsson .....	47
5.1.4. NSN.....	48
5.1.5. Samsung .....	49
5.1.6. Alcatel-Lucent.....	50
<b>5.2. LTE-Advanced chipsets and devices</b> .....	<b>51</b>
5.2.1. Chipsets .....	51
5.2.2. Devices .....	53
<b>6. LTE-Advanced market taking off in 2014</b> .....	<b>54</b>
<b>6.1. LTE-Advanced perspectives</b> .....	<b>54</b>
6.1.1. LTE-Advanced timescale .....	54
6.1.2. Services .....	55
6.1.3. LTE-Advanced tariffing: no premium but differentiation is likely .....	55
6.1.4. LTE-Advanced speeds: 300 Mbps coming soon (on the downlink) .....	55
<b>6.2. Market forecasts</b> .....	<b>56</b>
6.2.1. LTE-Advanced share of total LTE subscriptions.....	56
<b>7. Future trends: ‘5G’ already on radar screen</b> .....	<b>58</b>
<b>7.1. 5G technologies</b> .....	<b>59</b>
<b>7.2. Frequency bands for 5G: focus on millimetre bands</b> .....	<b>63</b>
7.2.1. 5G frequency band developments.....	63
7.2.2. Frequency bands below 6 GHz .....	65
7.2.3. Unlicensed frequency bands .....	67
7.2.4. Frequency bands above 6 GHz.....	71
<b>7.3. 5G initiatives</b> .....	<b>73</b>
7.3.1. European Commission initiative .....	73
7.3.2. METIS .....	74
7.3.3. ALU .....	75
7.3.4. Germany and UK initiative.....	76
7.3.5. Intel .....	76
7.3.6. South Korea .....	76
7.3.7. Japan .....	77
7.3.8. China.....	78
7.3.9. Huawei .....	78
<b>8. Glossary</b> .....	<b>79</b>

## Tables & Figures

Table 1:	LTE-Advanced speeds (April 2014) .....	10
Table 2:	New technologies and associated benefits in LTE-Advanced.....	11
Table 3:	LTE-Advanced deployment and features.....	12
Table 4:	Roadmap of LTE-Advanced implementations.....	16
Table 5:	Frequency bands and bandwidth used for LTE-Advanced carrier aggregation .....	27
Table 6 :	LTE-Advanced bandwidth and data rates .....	28
Table 7:	New technologies and associated benefits in LTE-Advanced.....	31
Table 8:	Possible UE RF architectures for LTE-Advanced resource aggregation .....	37
Table 9:	New UE Categories introduced with LTE-Advanced.....	41
Table 10 :	LTE-Advanced chipsets .....	52
Table 11:	LTE-Advanced smartphones and tablets at SKT (March 2014).....	53
Table 12:	LTE-Advanced deployment and features.....	54
Table 13:	SK Telecom LTE-Advanced services .....	55
Table 14:	LTE-Advanced speeds (April 2014) .....	55
Table 15:	Comparison of modulation schemes in existing and future radio access technologies.....	60
Table 16:	Microwave and millimetre bands.....	65
Table 17:	Main frequency bands for UMTS/HSPA/LTE deployment – FDD mode .....	66
Table 18:	Main frequency bands for UMTS/HSPA/LTE deployment – TDD mode .....	67
Table 19:	Main unlicensed bands below 6 GHz.....	67
Table 20:	Wifi generations .....	68
Table 21:	Spectrum bands targeted by Metis (9-37 GHz & >40 GHz) .....	71
